

## Case Study of Akuvox Smart Access Solution

An Integrated Smart Intercom & Access Control Solution for Guarini Plumbing

### An Upgrade for Guarini Plumbing's Parking Lot in New Jersey

Guarini Plumbing is a diverse private plumbing enterprise in the USA, and its parking lot serves as a crucial access point for both employees and visitors. However, its original access system lacks real-time monitoring of parking access events or suspicious activities and remote access control, increasing potential risks and requiring extra manual efforts. With the rising traffic and mounting operational pressure, Guarini Plumbing's parking lot required an upgrade to a modern intelligent access control system that enhances security and efficiency in order to optimize both operational control and user convenience.

**Property Type:** Private Enterprise (Parking lot entrance and exit for staff and visitor access management)

**Location:** Guarini Plumbing, New Jersey, USA

#### Products Deployed:

X912K Door Phone | 1 unit

A03 Access Control Terminal | 1 unit

ACR-CRP12 Long-Range Access Control Reader | 1 unit

SmartPlus Cloud Accounts | 114 registrations

**Solution Highlights:** Akuvox Smart Access solution, equipped with X912K door phone and A03 access control terminal for this case, provides a variety of authentication methods to meet different needs, including anti-spoofing face recognition, access codes, RFID access via ID cards or key

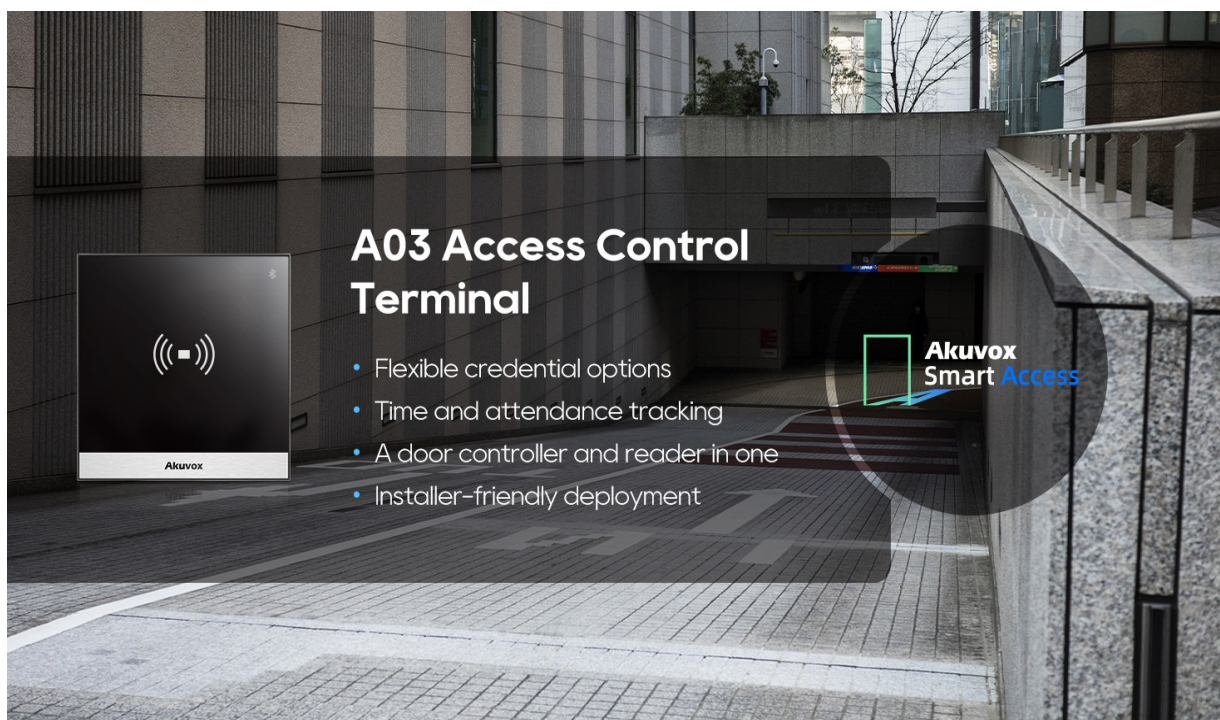

fobs, Bluetooth (BLE) access via smartphones and QR code access. Property administrators have the parking lot under reliable remote control and supervision via SmartPlus cloud portal and mobile app. The overall efficiency and security are significantly boosted.

## Solution

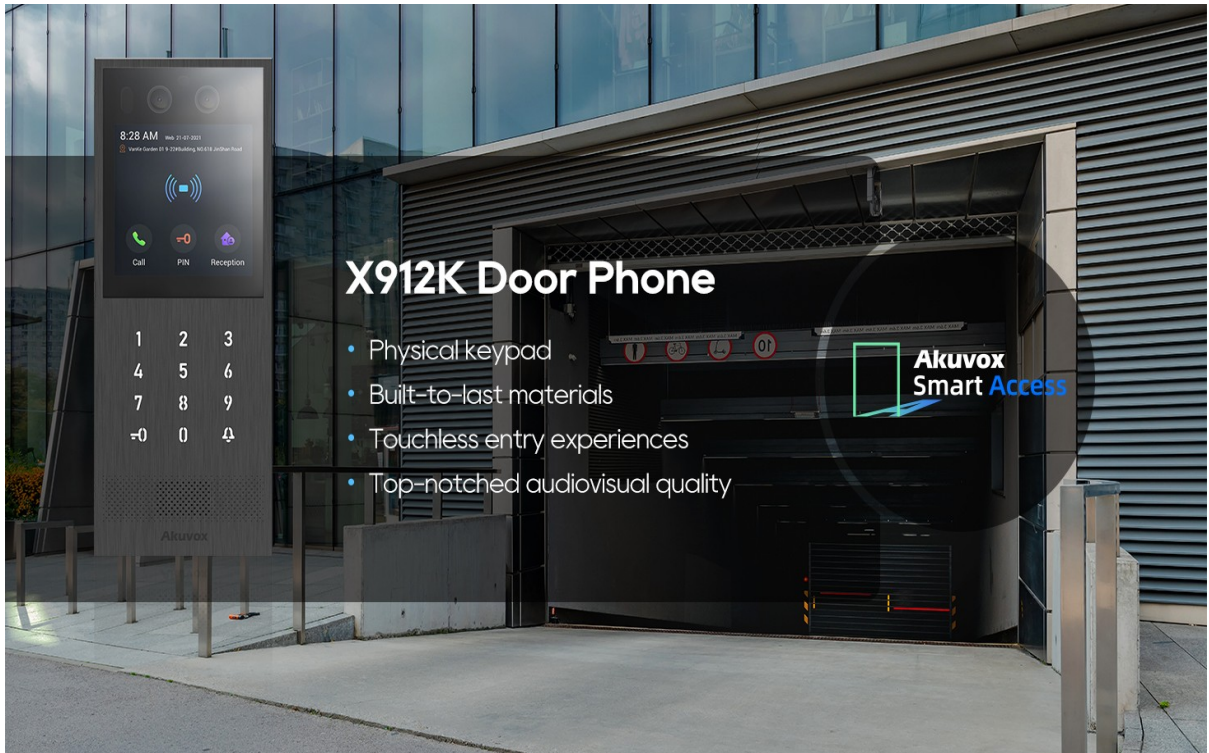

Akuvox integrated a tailored smart access solution seamlessly with the existing security infrastructure for Guarini Plumbing's parking lot.

**A03 Access Control Terminal** Connected to the Akuvox SmartPlus cloud platform, it enables remote access management, and time and attendance tracking and provides detailed entry logs for real-time monitoring and reporting.

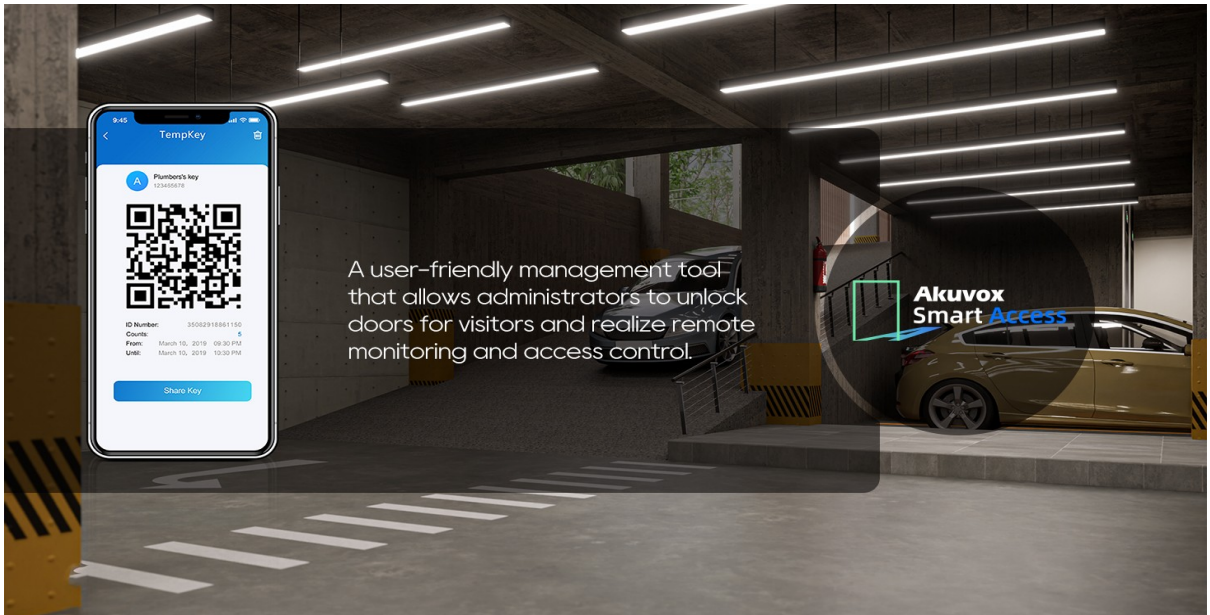

**X912K Door Phone**, installed at entrances and exits, provides multiple access control methods for secure entry, and enables seamless communication between administrators, employees and visitors.

**Akuvox SmartPlus**, a cloud platform, enables remote management and real-time access monitoring on SmartPlus App on administrators' mobile devices.

## **Results**

The Akuvox Smart Access Solution has brought a significant improvement in the access control of Guarini Plumbing's parking lot and offered intuitive and secure experiences. Administrators now realize real-time access management, employees hassle-free entry process, and visitors smooth access. Thanks to Akuvox's highly secure access system, user-friendly operation and reliable performance, the company now enjoy a much more productive business environment.
